Collax Groupware Suite
Secure. Mobile. Connected.

CGS COLLAX GROUPWARE SUITE

COLLAX Flexible IT

Mobile working - at home. On the road. At the workplace.

Topics such as Bring Your Own Device (BYOD), file sharing and web meetings are not just buzzwords, but are increasingly dominating the everyday working lives of small and medium-sized enterprises. An IT platform that is available company-wide is indispensable here for business communication.

The Collax Groupware Suite facilitates teamwork through file sharing, web meetings, mailbox sharing, shared contact management and extended calendar functions. With its integrated mail server, the Collax Groupware Suite offers not only modern groupware functions, but also the highest level of e-mail security. The Collax e-mail archive enables audit-proof archiving of e-mails as well as electronic invoices (e-invoicing).

Simple. Secure. Complete.

The award-winning collaboration solution Kopano is already included. This gives you all the functions of a groupware solution:
Email, group calendar, tasks, contacts, mobile devices and web-based client.

Hierarchically arranged filters ensure maximum security against spam and other malware. In addition, mobile teamwork is completed by web meetings of the highest quality and secure file sharing.

For optimal collaboration, the Collax Groupware Suite also provides a shared file server. An already integrated backup and restore solution can back up your entire server, including all user and configuration data.

Customized scope

Depending on the requirements, the Collax Groupware Suite is available in three different editions
Collax Groupware Suite Home
Collax Groupware Suite Basic
Collax Groupware Suite Pro
